Turn Black to Green

## Integrating LipoGreen technology in cleaning methods

### Physical:

1. Booming & Skimming
2. Manual removal
3. Mechanical removal
4. **Washing ability**
5. Burning

### Chemical:

1. **Wetting effect**
2. Solidifiers

### Natural:

1. Evaporation & Photo oxidation
2. **Enhance Biodegradation**

## Advantages on other technologies

1. We allows "on site" treatment which avoids soil transportation to treatment sites.
2. Our technology is 100% organic and 100% biodegradable
3. Acts as a “wetting” agent
4. Highly effective at low concentrations
5. Releases the majority of oil trapped deep in sand and soil
6. Accessible source of Nutrients for oil digesting flora
7. The ball shaped technology can be encapsulated with water soluble compounds
8. Inexpensive and easy manufacturing procedures
9. Easy to store and use
10. Long shelf life

## **LipoGreen Products and applications:**

### **Physical cleaning**

**F-3 : Hydrocarbon rinsing from soil**

Two formulas of  
LipoGreen nano size  
technology

### **Bioremediation acceleration**

**F-61: Enhancing bacterial oil degradation**

**The Team:**

**Ronen Nahary Ph.D - CEO**

**Prof. Yechezkel Barenholz - Scientific Board Chairman**

**Prof. Herve Bercovier - Scientific Advisor**

**Haim Rapoport Ph.D - VP Business Development**
